The Honorable William K. Reilly  
Administrator  
U.S. Environmental Protection Agency  
401 M Street SW  
Washington, DC 20460

Dear Administrator Reilly:

As Majority Leader of the Illinois House of Representatives, I am deeply involved in the efforts of the Illinois General Assembly to address issues relating to our environment. One of the issues which continues to arise is the air quality in Illinois. Air pollution has proven to be a significant issue in Illinois, and we are constantly in search of ways to address this issue by improving the quality of air in our large cities and throughout the State.

It has come to my attention that a performance additive, HiTEC<sup>®</sup> 3000 is currently under consideration by the Environmental Protection Agency. It is my understanding that this additive may present a real opportunity to substantially improve air quality in the United States. HiTEC 3000 may reduce smog-producing nitrogen oxide, as well as overall tailpipe emissions. In addition, I understand this additive is compatible with gasolines containing methanol, ethanol and other reformative fuels which are also important to us in Illinois.

We in the General Assembly are concerned about these matters and believe it is critical to find ways to reduce air pollution and improve air quality. For this reason, I urge the Environmental Protection Agency to give its full consideration to the use of HiTEC<sup>®</sup> 3000.

Sincerely,  
*Peg McDonnell Breslin*
